

Quality. Immediacy. Efficiency.

In today's healthcare environment, three things matter: Providing quality care, doing so in an expedient fashion, and providing that care in a cost-efficient manner. For the past decade, InSight Telepsychiatry, LLC has been leading the way in doing just that.

Our telepsychiatry program has improved the quality of behavioral healthcare at every location where it has been introduced by using technology to eliminate barriers to timely, effective psychiatric treatment.

Our Value Proposition

- Guaranteed Quality
- Appropriateness of Care
- Timeliness of Service
- Risk Reduction / Safety Protocols
- Regulatory Compliance
- Performance Improvement
- Employee Retention & Patient Satisfaction
- Cost-Effectiveness

What is telepsychiatry?

Telemedicine generally refers to the delivery of care via televideo equipment. In recent years, telepsychiatry has emerged as a fast growing, specialty field in telemedicine that has been successfully integrated into existing healthcare systems to enhance and often expand service delivery. Telepsychiatry alleviates geographic barriers, improves access to care, reduces risk, and is cost effective.

Founded in 1999 through the CFG Health Network, **InSight Telepsychiatry, LLC** is an innovative physician owned organization that provides thousands of telepsychiatry consultations annually, allowing for face-to-face psychiatric evaluations with a behavioral health specialist regardless of the location of the patient.

What does this mean? It means a patient in a rural, remote facility who needs help at 3 a.m. receives the same quality of care as someone who is transported to a psychiatric crisis center of a major metropolitan hospital in the middle of the day, and at a fraction of the cost. **It means** that correctional facilities no longer have to risk taking an inmate into the community to determine whether admission to a psychiatric center is warranted. **It means** that the needs of our customers are met as soon as they arise. At InSight Telepsychiatry, LLC, we provide psychiatric services to anyone, anywhere at anytime.

InSight Telepsychiatry, LLC is dedicated to delivering the highest quality service. For the past decade, our proven telepsychiatry programs, experienced personnel and unmatched expertise have made InSight Telepsychiatry, LLC the premier telepsychiatry services provider for both private and public sector organizations.

We are proud of our ability to design and implement customized programs based on the specific needs, resources and operational characteristics of our customers.

- Scheduling of all clinicians
- Continuous IT support
- Customized programs to customer needs

Our Existing Customers

Hospitals, Psychiatric Crisis Centers, Residential Treatment Facilities, Physician Offices, Shared Service Programs, Military Installations, Correctional Facilities

Testimonials

Cumberland County Guidance Center Elvira Smith, Director

"We've worked with InSight for ten years now, and could not imagine having to operate without their telepsychiatry service. We are extremely satisfied with their level of expertise and customer service. They are committed and available whenever we need them. There is not a better way to ensure quality care. It's the right way to do things. If you're not currently working with InSight, my only question is, Why not?"

Middlesex County Adult Corrections Center

"Before working with InSight, we would consistently have to transport inmates to the local hospital ER, where the inmates could wait up to two days to receive treatment. Such a wait not only denied the inmate timely service, but it also strained personnel and budgetary resources since the local municipalities are required to use two police officers to transport the inmate. The use of InSight's telepsychiatry services significantly improved quality and timely care and resulted in significant cost savings in labor."
